Standard Lime & Stone Quarry, MAIN SUPPLY BUILDING

HAER No. WV-49-M

Location: Standard Lime & Stone Quarry, central portion of plant area, County Route 27, Millville, Jefferson County, West Virginia.

UTM: 18.4353600.260110
Quad: Charles Town, West Virginia

Significance: The Main Supply Building is a partially intact example of an industrial architectural type used for support structures at the Standard Quarry.

Description: The building is a large, steel-framed, one-room structure clad in corrugated metal and measuring approximately 45 by 85 feet. The floor is concrete. Although the roof covering is missing, the original gambrel roof form is evident. Windows are typical multi-pane, industrial steel sash. The building is elevated above the main service roadway and has a sliding door on the front (east) side for loading supplies onto trucks. There is a wood-frame, one-story addition on the north side. The building is in poor condition.

History: The building was erected by the Standard Lime & Stone Company c. 1930. It was used as the primary repository for quarry supplies.
